

A. **Sheldon PPA001K Axis Table Privacy Panel Kit:**

Privacy Panel Kit includes a set of (3) panels.

1. The PPA0001 Privacy Panel is 14" high x 19" deep. It consists of a 1/4" thick marine grade polymer panel with a black matte finish and a smooth bullnose on all exposed panel edges, as well as a reinforced polycarbonate attaching bracket with integral stabilizers.
2. Privacy Panels shall attach to the edge of an Axis table top, without the use of tools, with a hand-tightened threaded adjustable bolt. Each end of the threaded bolt shall have a protective hard plastic cover.
3. Privacy Panels shall provide a vertical barrier that assures student privacy during testing. While not in use, panels shall be easily removable from table top for storage in a TM426122-200 Privacy Panel Storage Cabinet, when cabinet is specified.

4. Physical and mechanical properties.

a.	Panel properties:	Tensile strength, psi	4,100 psi
		Flexural modulus, psi	185,000 psi
		Hardness, durometer	68 Shore D
		Density, g/cc	.955 g/cc
b.	Attaching bracket properties:	Tensile strength, psi	16,000 psi
		Flexural modulus, psi	500-800 kpsi
		Hardness, durometer	91 Rockwell M
		Specific gravity	1.35
